LADIES WHO SMOKE IN TECH SHOW CAST

Graceful Girls And Dainty Dancers Train With Cruel Cannibals

As a result of nearly four weeks of good stiff rehearsing, "The Queen of the Cannibal Isles" is beginning to sound like an up-to-date twentieth century musical comedy, stocked full of catchy music.

During the past week the chorus has been busy putting considerable time and practice in the gentle art of stepping. It has been a rather amusing sight to see the group of so-called would-be ponderous engineers, grinds and sports assuming what they thought was a feminine manner. The fellows are fast getting on to the game and all that is needed to make fine birds out of them is a bit more practice and a few fine feathers. Coach Francis predicts a chorus full of graceful, petite damsels of the a la Belden type. The six-foot cannibals, guards and sailors in the chorus will surely afford a good contrast to the "girls."

Clever dancing and singing will be more of a feature of this year's show than ever before. Many surprises, it is said, are in store for all who witness one of the performances during Junior Week.

This year, instead of having the usual sextette of ballet dancers, there will be tight "fair ones" to please the audience with something entirely new in the line of fancy dancing. Two of last year's sextette of Spanish dancers are in the ranks this year, namely: E. G. Brown and Jenckes. Light-weight E. G. Brown, the star weight loser of last year's six, said yesterday that he was out to break all records in this line. All the men are working hard and eagerly looking forward to the time when Mrs. Francis will arrive to put the finishing touches on their dances.

The leading ladies and star actors in the cast have also been diligently rehearsing their parts amid clouds of their own tobacco smoke. The Queen, Would-be Queen, suitors and lovers are seriously working to "integrate" a successful act. Seven out of the fourteen

(Continued on page 3.)

TECHNIQUE 1912

All Who Wish To Have Names On Ballot Must Pay

All men who wish to have their names printed on the Technique 1912 Electoral Ballot must have their dues paid on or before today, Tuesday, March 1, at 4 P. M. Otherwise their names will not appear on the ballot. These ballots will be left at the Cage on Thursday or Friday of this week and every man registered in the sophomore class can vote, provided his dues are paid. If a man's dues are not paid his vote does not count unless he encloses his dues in the envelope with his vote when left at the Cage. All ballots must be filled out, placed in an envelope on which the name is signed, and left at the Cage by 4 P. M., Wednesday, Mar. 9.

The above rules were decided upon by the executive committee of the class. The committee urge the members of the class of 1912 to vote regardless of the Point System since positions on the Electoral Committee are frequently desired more than other positions which count points against the nominees.

DR. H. D. GALLAUDET TO SPEAK TO T. C. A.

"Two Kinds Of Towers" Topic At Usual Wednesday Eve Dinner

At the usual Wednesday evening dinner and meeting of the Technology Christian Association, Dr. H. D. Gallaudet of Central Church will speak on "Two Kinds of Towers."

Anyone who has heard Dr. Gallaudet give his humorous, keen and yet so very inspiring talks will know it to be a thing none can afford to miss. Mr. Gallaudet is a minister in Central Church, and has had a good deal to do with Tech men, and for that reason can give a talk that can be of value to students.

The dinners themselves are becoming of such value as a social gathering, and the good fellowship enjoyed there is worth the while coming for. A week from this Wednesday comes the big membership meeting. Dinner begins as usual at 6 o'clock.

Sunday the T. C. A. Council met to further consider the basis on which the membership of the Association should rest. It determined that before all else the matter of having the Institute know exactly what the association is, and its aims and value, was the most important. A good deal of uncertainty as to this has been met by the organization. The Council states that the Association is not meant for a few men who enjoy hymn singing or a close corporation. It must be and is an association for all men, regardless of creed, nationality or any other characteristic. Its purpose is not to assemble a couple of dozen to sing and play and testify. The association points out that its purpose is to build up social life, to establish Christian principles, to fit men, in fact, for true Christian citizenship—the sort of citizenship which is seen in the present Governor of New York, the sort which prompts the fearless action by one or two men in fighting the giant combinations of power, to save the public from oppression or robbery. The aim of the association is to eventually unite the strength of the Institute in an effort to build lives, to create fellowship.

The Advisory Board, composed of faculty and alumni of the Institute, through Walter B. Snow 1894, chairman, extends an invitation to every one to attend the meeting which will follow the regular Wednesday dinner on March 9th. Here, alumni, faculty and undergraduates will be represented and will state the truth of Technology Christian Association. Christianity is the basis, Christian Citizenship the object.

1913 CLASS MEETING

The freshman class decided, after much discussion at their meeting yesterday to support the Institute Committee in everything.

President Holmes read the proposition of the Institute Committee that they look over the accounts of the treasurer of every student activity. H. S. Birchard, treasurer of the class, spoke for this measure. He stated that most of the treasurers of the Institute had welcomed such a proposal. Any fellow that is trying to keep his accounts straight is glad of assistance. Treas. Birchard moved that the class accept the Committee's proposition. The motion was carried.

P. M. Hamilton moved that the resolution be adopted by 1913. When the question was put to vote, the motion was carried. L. C. Hart was elected clerk of the class.

F. A. MOORE RESIGNS FROM TECHNIQUE BOARD

G. S. Anderson Takes Up Work With \$1,700 Signed---Bright Outlook.

At the recent meeting of the Board of Editors of Technique 1911, F. A. Moore 1911, the business manager, handed in his resignation. Moore has left the Institute to accept a position in his home town, Tyler, Texas. The Board regretted the action particularly because Moore has done so much to set the finances of Technique in a very promising position. He leaves all affairs in the best of condition with a total of \$1,700 of advertising contracts signed. A conservative estimate of the abilities and resources indicates that if about 800 books are sold the Board will come out with a slight profit. Already more than 500 books have been signed up and among these are over 150 of the De Luxe (leather covered edition.)

C. S. Anderson 1911, of Roxbury, has been elected to take Moore's place. Anderson made the position of Assistant Business Manager last November in competition and has done excellent work in getting advertisements and signing up books. The Board feel confident that he will ably carry on the work so well begun by Moore. Anderson will have for assistants C. T. Morey, N. Duffet, and K. Faunce, all of 1911, and will continue to hustle for subscriptions and advertisements. Up to date the book is financially well ahead of last year's book.

Technique will be issued at 12.15 Saturday, April 16. The usual rush will take place in the rear of the old (Continued on page 4.)

FACTORY MANAGEMENT

Subject Of 3 Talks By M. C. Whitaker Of Welsbach Co.

On Wednesday, Thursday and Friday of this week Mr. M. C. Whitaker, General Superintendent of the Welsbach Company will speak on "Factory Management" in Room 23 Walker at 4.15. Mr. Whitaker was formerly associated with Columbia University and is now at the head of one of the most carefully organized establishments of the country with his headquarters at Gloucester, New Jersey. The manufacture of incandescent mantles involves a very large number of industrial processes each of which must be most skillfully performed or the product is worthless. It is, moreover, imperative that the product should be uniform and of standard quality and that any accidental variation should be at once traceable to its cause and source. To obtain this a very complete and yet workable system of management has been developed and it is of this that Mr. Whitaker will speak, not of the chemical aspects of the mantle industry. He has already established a reputation as an interesting speaker through his lectures at the Institute a few years ago.

While Mr. Whitaker comes to the Institute at the invitation of the Department of Chemistry and Chemical Engineering, his talks should have equal interest for all who look forward to the superintendency of industrial plants and to all who wish to hear the views upon matters pertaining to the employment of labor in general. The talks are open to all who are interested.

TAKE OFF THAT HAT DON'T BE A ROWDY

Chairman Davis Scores Misuse Of Union In Interesting Report

Below there is printed in full the report of the chairman of the house committee for the period, October, 1910 to February, 1910. The most salient points are the neglect and misuse of the rooms and equipment by the students. The committee has suffered many changes in membership on account of the action of the point system.

"The problem most difficult of solution now before the House Committee is that of creating more of a club or home atmosphere in the Union social rooms. As yet nothing has been done about the matter.

"Fellows who would not think of wearing their hats in their own or in friends' parlors, never think of removing their hats in the Union, and many who take them off in the large social room put them on again when they enter the card room. The least undesirable methods of bringing about a change seem to be either to speak to each offender individually or else to open a publicity campaign by means of resolutions to be adopted by all the activities and societies, the fraternities included, so that every undergraduate will realize that more respect is due the gift of a generous alumni than would be expected from the frequenters of saloons and pool-rooms.

"The magazines and binders that have been placed in the large room are very roughly used. The locks have been torn off several covers by unknown persons, though the magazines have not been taken away. Some of the magazines receive unwarranted hard usage. Usually the cover and a few pages of "Life" are left for interested readers, but the two-page drawing in each number has been often removed a few days after it is received.

"Judging from the way in which some of the chairs have been split and smashed they have been used as weapons.

"Writing on the walls of the lavatory has not been discontinued.

"The remedies for all the above-mentioned problems will doubtless prove to be those mentioned in the second paragraph of this report. It is the opinion of both the last and the present Chairman of the House Committee that there are several fellows who ought not to be allowed in the Union at all, and perhaps later in the year, if other means fail, some such action will have to be taken.

"There have been many changes in the personnel of the Committee during the term. The members left from last year were: J. M. Fitzwater 1910, chairman, Elmer Jacobs 1910, S. P. Kimball 1911, and R. O. Wood 1911, secretary. H. M. Davis 1911 was added to the Committee, and a little later L. C. Hart 1913 and G. M. Denkinger 1913. On Jan. 6, much to the regret of all concerned, Mr. Fitzwater resigned, and Mr. Davis was elected to his place pending (Continued on page 3.)

Gondokoro, Soudan, Feb. 27.—Theodore Roosevelt and his son Kermit, accompanied by the members of their shooting party, arrived here Saturday evening on the Belgian gunboat Boch. All were looking wonderfully well. Col. Roosevelt, in the last expedition, killed one bull giant eland, while Kermit killed a bull and a cow. They had spent from 12 to 14 hours daily in the chase. The heads of the animals are considered extraordinarily fine.

THE TECH

Published daily, except Sunday, during the college year by students at the Massachusetts Institute of Technology.

Entered as second-class matter, Sept. 29, 1909, at the post office at Boston, Mass., under the Act of Congress of March 3, 1879.

All communications should be addressed to the proper departments.

Subscriptions \$1.50 per year in advance. Single copies 1 cent.

Subscriptions within the Boston Postal District and outside of the United States must be accompanied by postage at the rate of one cent a copy.

Printed by Puritan Linotype, Boston, Mass.

BOSTON, MASS., MARCH 1, 1910.

Although The Tech is glad to publish communications on all subjects of interest to the Institute, provided always that they be printable, we do not publish them if anonymous. If so requested, however, the names signed to communications will be withheld. We call attention to this rule because anonymous communications have been handed in, and we wish the authors of them to understand why they have received no attention. This rule applies also to unsigned notices and news articles. It will save men considerable inconvenience if they will remember this rule.

Tonight the Cosmopolitan Club starts with the first meeting of its existence at Tech. Whether it is successful or not will depend on the true character of its purpose of existence. One of the most beneficial results of such an organization will be the opportunity it will offer for the faculty and students to get together outside of the class room. The foreigners and those of the United States membership are to be congratulated on this opportunity. The purely social purpose is liable to be rather a weak basis, but with the rooms and the large proportion of foreign students who are just aching for this social opportunity, the organization should be well able to hang together.

TECHNIQUE 1912.

The first guns in the Technique 1912 campaign were fired yesterday by the Executive Committee of the class. At last the ball has been set rolling. It is now up to the members of the class to work and support the annual publication. It should be recognized at the start that the work will not be all clear sailing. Difficulties are to be overcome and many problems must be solved. There is one thing that must be preserved throughout the entire work. Absolute unity must be maintained by all members concerned. There is nothing that will ruin the most effective work as personal feeling and politics. 1912 has always steered clear of the "popular man" in class politics and if it continues to do so, it is reasonable to expect that the volume which this class will turn out will carry with it the initiative and quality of the entire sophomore class. Here's good luck to Technique 1912.

GENERAL NEWS

TELEGRAPH NEWS OF THE MORNING.

WEATHER REPORT.

Washington, March 1.—Fair and colder, moderate variable winds.

Cleveland, O., Mar. 1.—The west-bound Twentieth Century Limited was derailed twenty miles west of Cleveland at 3 o'clock this morning, while running at 60 miles an hour. Two or three passengers were slightly injured. All seven cars were derailed, but not thrown more than a few inches from the tracks.

Spokane, Wash., Mar. 1.—More than 100 lives have been lost, it is feared, in

the two great snow slides which have brought dismay to the mining towns of the rich Coeur d'Alene district in northern Idaho.

Little Rock, Ark., Mar. 1.—The leading bankers of this city have formed a company and will put up a \$200,000 plant to see if they can make profitable the diamond mine near Murfreesboro, Ark.

Boston, Mar. 1.—With the discovery yesterday that a well-known Boston banker had been swindled out of \$60,000 by the gang that wrecked the National City Bank of Cambridge, the exposure of the great Boston bunco syndicate, led by "Big Bill" Keliher, reached a crisis. This revelation brought the total known operations of the gang up to \$204,100, with a certainty that the profits of the syndicate had been much more than that.

London, Feb. 28.—Financial business first and the question of the House of Lords second, was the program laid down by Premier Asquith in a statement made in the House of Commons this afternoon, in moving that government business have precedence at every sitting up to March 24.

DEFICIT ON THE WANE

Still improving. In spite of the holiday last week the Union is able to show a balance on the right page. This credit is partially explained by the serving of refreshments at the meetings of the Mining, Chemical and Electrical Engineering Societies as well as catering for the Military Ball in Howe Hall last Friday.

This week starts off in a most promising manner with a record breaking attendance at luncheon of exactly 400. The largest previous attendance this year was 376 immediately after the Christmas vacation.

The deficit up to Feb. 26, exclusive of the Entertainment of Feb. 18, which has not been settled up as yet, is \$214.11. This also does not include expenditures for equipment or charges for depreciation. When the Feb. 18 entertainment account is completed it will probably knock off about five dollars from this deficit. The Union needs all the support it can get to show a profit or even no loss at the end of the school year.

The following report is submitted by Mr. Scharff for the past week ending Feb. 26:

TAKE OFF THAT HAT

(Continued from page 1.)

The action of the Institute and Union committees. On the same day Mr. Wood resigned because of the Point System and Mr. Hart was elected secretary. On Jan. 13 Mr. Kimball resigned because of the Point System. To fill the vacancies thus made the following appointments were made: H. F. Dolliver 1911 and Malcolm Lewis 1913. There has been one member in charge of the Union every day in the week, Sundays excluded. This term a man will be added to the Committee who will be in charge Sunday, since the Union is open that day.

"Among the more important changes of the term are: a stereopticon lantern, curtain, pointer, and ticker have been purchased; a shoe-blackening outfit has been placed in the lavatory; stamps are now on sale at the Cage; the banner from Harvard by the cross-country team last fall has been received; no card playing is now allowed in the large social room unless the small dining room is in use; the Wireless Society and the C. O. A. have been given desk room in room A.

"The magazines now subscribed to are: Literary Digest, Outlook, Collier's, Life, Harper's Weekly, World's Work, Review of Reviews, Saturday Evening Post, Scientific American, Technical World, Century, Scribner's, Harper's Monthly, McClure's, Everybody's, and Pathfinder. We think it advisable to subscribe as soon as possible, as they may be convenient to the American and a few similar magazines.

"Everybody's, McClure's, etc., are read by a good many fellows, but Harper's Monthly, the Century, etc., are relatively little used. The preference of the majority of the fellows is evidently for the light class of magazines; probably because they afford more relief and change from the regular Institute routine.

"Altogether there is much to be done in the Union during the remaining half year. The House Committee is powerless to accomplish it without aid; the co-operation of the student body is necessary.

Respectfully submitted,
HAROLD M. DAVIS 1911."
Feb. 8, 1910.

LADIES WHO SMOKE

(Continued from page 1.)

principals are old Show men. S. A. Malcolm, who has been in three past plays, besides being the author of last year's "That Pill Grimm," and the hero Grimm, has a leading role this year. He has, however, changed sex and is playing the part of the villainess, the would-be Queen of the Cannibal Isles. Instead of, as last year, scheming against the Burgomaster and Pilgrims, Malcolm has his hands full dodging suitors and scheming to do the Queen out of her seat on the throne.

The heroine of the play is a charming millionaire's daughter, which part is to be managed by C. P. Kerr, one of last year's fair chorus girls. "Great Big Medicine Man," alias H. E. Kibbon, has a band of Royal Guards under him instead of Indians, as was the case last year. With the experience he gained with the red men, he is sure to make a first-class Captain of Royal Guards.

William Schofield, who scored such a hit in "The Freshman," as the Freshman, is busy trying to beat William Randolph H— at his own game as Jones the American News Correspondent.

Donald Bent, one of last year's Merry Widows, is making good in the cast as one of the suitors of the Would-be Queen. C. A. Stewart, one of the authors of the play and one of last year's Indians, is to be Cannibal Chief this year. He along with the rest of his band of Missionary eaters will evidently make things lively.

At this early stage in the game little can be said of the remaining new portion of the cast, other than they look more like "comers" at every rehearsal. If everything goes at its present rate, play will be ready to present to the public on April 15th.

Will the person who took my coat by mistake from the Phys. Lab., Thursday afternoon, please leave it at the Cage for E. T. Wettengel.

TO LET.—Large square room, suitable for one or two young men. All conveniences. Private family. Apply to Mrs. Brown, 124 Huntington Ave.

Members of C. E. SOCIETY—who have not yet paid their dues should do so at once in order that their names shall be included in the list of members in Technique. No names of men whose dues are not paid will be included.

Fifteen of the following men will be picked to go to Lowell next Saturday night: Morcon, Trull, Thompson, Burnham, Mattson, Sampson, Bylund, Munch, Milliken, Brett, Bonney, Hamilton, McLeod, Fallon, Rankin and Cairns. Everybody out for practice.

WM. KATZENBERGER, Mgr.

F. A. MOORE RESIGNS

(Continued from page 1.)

Art Museum. The first five books will as usual be given away free.

They will be edition de luxe style, and it is expected that competition in the struggle will be keener than ever. The first twenty books will be signed by the President of the Institute and will be numbered on the cover with numerals sufficiently large enough to be seen. Over half the book has been sent to the printer and the remainder will be set up about March 15th.

Much of the art work has been finished, and some very clever drawings have been received. It is probable that some of these will be exhibited in the Technique case in Rogers corridor from time to time. Some excellent cartoons have been received for the Grind department, and many good hits are in store for the men about the Institute.

The Board refused to ratify the suggestion of the Institute Committee relative to the appointing of an advisory committee, but gave the Institute Committee power to enforce the point system in so far as Technique was concerned.

From Seattle comes the news that the students at the University of Washington are to be organized into an efficient fire brigade. A chemical engine will be given into their charge, and ample protection will thus be afforded the university buildings at all hours of the day and night.
